

Sun Ace origins date back to a Japanese company Shinagawa Chemicals, established 1940. Shinagawa Chemicals was a Polymer Additives & Speciality Chemical manufacturing company, which evolved into the company we know today, namely, Sun Ace Corporation. Sun Ace Corporation are recognised as a leading Global Manufacturer & Innovator of PVC stabilisers and metallic soaps.

We produce a range of chemicals for numerous customers in the PVC, petrochemical, food, personal care, pharmaceutical, plastics, rubber, cement and coating industries. Sun Ace South Africa has ISO 9001:2015, ISO 14001:2015 and OHSAS 18001:2015 certification. Besides providing the various chemicals, our strength lies in our Technical Services support we provide to our customers, backed up by our laboratory to do the relevant testing. This support is enhanced by our Manufacturing Team with long tenure and experience in PVC industry.

### **PRODUCTS**

#### **PVC Stabilisers**

Application: Pipe, Fitting, Window, Cable, Sheet, Film, Packaging

#### **Metallic Soaps**

Application: Polyolefin, Polystyrene, FRP, Rubber, Paint, Cosmetic, Food, Medical, Pharmaceutical, Pigment, Cement, Coated Sand

#### **Speciality additives**

Non-vinyl Additives, Rubber Additives, Chemicals for Semiconductor, Cattle Feed Additives, Metallic Stearates, UV Stabilisers, Anti-Oxidants, Process Aids, Impact Modifiers, Blowing Agents, Lubricants, Semiconductors
